Exam One

The first exam covers tanks, linear first-order equations, separable ODEs, and first-order constant-coefficient linear systems.

- This includes y_c, y_p, and initial conditions.
- The exam will be like HW (with simpler boxes) stuck together.
- Four questions, on both sides of two sheets of paper, totaling 50 points.
- You can write anything you want on a notecard up to 4×6 inches.
- The exam is in class on November 5.
- We finish exam material October 29.
- Monday, Tuesday, and Wednesday mostly review with some new material.

The exam is intended to be very predictable.
